TUNING FORKS

Therapeutic tuning forks are precisely calibrated instruments that can be utilized in two primary ways: they may be played lightly in the aura to clear energy and promote mental clarity, or applied directly on the body (especially the weighted forks) to transmit deep vibrations into the tissue and bone, offering profound physical relaxation. These vibrations can help reduce pain, relieve muscle tension, and induce a state of deep nervous system calm, aiding integration of healing modalities like massage and acupuncture. Integrating them into daily life is simple, requiring only a few minutes to strike a fork and place it near the ears or on major energy points for immediate grounding and stress reduction.

Brainwave Tuning Fork Set

This brain tuning fork set works with binaural beats by using the “Fundition” (256 Hz) fork as the fixed carrier tone and pairing it with each of the other four forks to create specific beat frequencies. Hold the “Fundition” fork on your left ear and choose one of the other forks for your right ear for the desired effect. When you strike the “Fundition” fork of 256 Hz and, for example, the Theta Fork of 262 Hz, you perceive the 6 Hz difference, causing your brainwaves to synchronize (entrain) to the Theta state associated with deep relaxation and creativity. By selecting different pairs, you can quickly and reliably guide your brain into the corresponding brainwave states.

It translates the orbital periods and rotational speeds of celestial bodies (like planets and the moon) into audible frequencies. This is achieved by repeatedly doubling (octavating) the astronomical period until the frequency falls within the range of human hearing. Its main purpose is to create precisely tuned instruments that resonate with these cosmic rhythms, offering a therapeutic tool to harmonize the body and mind with the stability and order of the universe. The benefits include deep relaxation, energetic centering, and the promotion of psychological and physical balance by aligning the user's energy field with planetary cycles.

Jumbo Tuning forks feature adjustable weights and are specialized therapeutic instruments, often referred to as weighted tuning forks. They are designed to transmit deep, palpable vibrations rather than just auditory tones. The frequency can be changed by moving the weights along the tines. These large forks are typically applied directly to the body, muscles, joints, or acupuncture points to promote deep tissue relaxation, reduce pain, and facilitate the flow of energy via bone conduction.

Lumi Singing Bowls

Price: 1.750.000 IDR per kilo

These are lightweight, resonant singing bowls that are hand hammered, made from brass. The finishing is created with firing to create a shiny rainbow effect. Each bowl carries a unique frequency, from smaller bowls with clear, high-pitched sounds to bigger bowls with deep, resonant vibrations.

Dolphin Sounds

These brass singing bowls can be used with a small amount of water inside the bowl to create a mesmerizing effect of moving water particles. Gently run the mallet on the outer rim. As the bowl vibrates, the energy creates standing waves on the surface of the water, causing it to ripple, spray or form intricate patterns that visually demonstrate the power of the resonant frequency. You can also strike the bowl and move the bowl around, so the moving water creates beautiful changes in the sound.

Head & Joint Bowl

This unique Head & Joint Singing Bowl features a central hole, which is specially designed to be placed directly over joints, knuckles, or the crown of the head to amplify vibrational healing. The hole allows for focused sound projection and targeted resonance, driving the therapeutic frequencies deeper into the bone and tissue for unparalleled physical relief. Use it to clear joint stiffness, reduce localized pain, and promote deep cranial relaxation and energetic alignment.

Singing Bowl Chakra Sets

This exquisite Chakra Singing Bowl Set features seven hand-tuned bowls, each corresponding to the seven main notes of the musical scale. The central concept is that the seven main notes

(C, D, E, F, G, A, B) align with the seven energy centers, starting with C (Root) and ascending to B (Crown). This practice is rooted in ancient Indian (Hindu and Tantric) traditions, which define the chakras as energy focal points; the musical scale is used to restore the natural, ascending vibrational harmony of this energy system. By playing the bowls in sequence, the set provides a sonic massage that clears, balances, and realigns each of your core energetic centers.
